SUMMARY

Passionate about automation, DevOps, & InfoSec to build scalable solutions that support the evolving requirements of enterprise

PROFESSIONAL EXPERIENCE

Solutions Architect | DevOps, Salesforce Practices

01/2021 - Ongoing

CGI Inc.

- Led, designed DevOps framework enabling teams to deliver projects and services at scale; increased team utilization
- Salesforce - Reduced deployments to 30 mins from 80 hours; enabled on-demand deployments; reduced complexity, trained dev teams

Solutions Architect | Digital Transformation Practice

10/2017 - 12/2020

CGI Inc.

- Developed the Microsoft strategic business unit; managed a team of 12+ consultants
- Directed and managed the Agile strategic business unit, Azure DevOps, Agile Excellence, and Technology practices
- App development - Designed and developed healthcare app; built integration to support 1+ million patient records per data load
- Marketing automation - Implemented Digital Asset Manager; managed asset migration; coordinated client meetings
- SaaS implementation - 22 successful implementations with custom integrations; directed and managed three project teams; trained and managed offshore development team; designed project framework utilizing DevOps principles, standardized implementations, and created analytics-based project management model; delivered projects 60% faster; architected change in client business model and recognized as a thought leader by the client executive leadership

Solutions Architect | Digital Practice

07/2017 - 10/2017

Sirius Computer Solutions

- Marketing automation - Supported the implementation/configuration of Adobe's Experience Manager; owned content management, campaign execution, and personalization (via clean data initiative); created 10 automated email campaigns sending 100K-150k emails monthly; mentored non-technical resource in basic web development skills
- App development - Led development and logistics for white label app; assessed and refined methodologies, re-envisioned processes, set benchmarks and schedules, managed client requests, provided strategic updates to stakeholders; automated build and deployment pipeline for mobile apps; reduced build and deployment time to 10 minutes from 2 hours
- Web application - Provided leadership and counsel to client on \$3MM website redesign with support for mobile web; scoped requirements, priorities, schedule, and processes; coordinated client meetings; led 4 disperse teams of 15 people

Senior Solutions Consultant | Digital Practice

01/2015 - 06/2017

Sirius Computer Solutions

- IBM implementation - Led client training of 15+ software developers and project managers; consulted on agile team structures, development of continuous integration and continuous build; built custom application teaching aid
- Mortgage app testing - Created and trained a software testing team comprised of non-technical resources; owned product testing, developed comprehensive test plan, and created training curriculum; directed client/stakeholder communications; established project goals for the team
- Healthcare app testing - Conducted product testing for a mobile application utilizing functional/non-functional requirements; documented findings, created artifacts, identified product risks, and outlined how to replicate and close defects

Solutions Consultant | Digital Practice

01/2012 - 12/2014

Sirius Computer Solutions

- Published 30+ articles to IBM Rational community blog Jazz.net; recognized by IBM as a technical expert and thought leader
- Researched and translated technical project requirements; communicated benefits of preferred tools and platforms
- Implemented, customized IBM's Rational tool suite; owned content migration; developed integrations; trained 100+ developers
